Vinification: in stainless steel tanks at 18-22°C, malolactic

fermentation

Refinement: in stainless steel tanks on whole lees for 4 months, after racking in January a further 5 months on fine lees

in stainless steel tanks

Color: straw yellow with fine perlage

Fragrance: notes of leavened dough, dumplings and dried

dates

Flavor: tones of apple strudel and lemon cake; dry with

sparkling acidity and a long lemon finish

Alcoholic Grade: 12% vol

Fred Loimer, who graduated in the early 1990s, caused quite a stir in Langenlois and the surrounding area because, despite coming from a traditional family of winegrowers, he decided to vinify the must obtained from Grüner Veltliner, Austria's leading grape variety, in barriques. In 1998, he took over the winery from his father and in 2000 had a minimalist black cube built on top of a 150-year-old cellar dug by hand into the loess in Langenlois, adding to the appeal of the already charming Kellergassen, or cellar lanes, and establishing himself as a true pioneer of the wine architecture movement. Closer to nature, Fred practises viticulture that protects the land and resources, thereby increasing the quality of the wines. The Loimer winery began converting to biodynamic agriculture in 2006, and in 2007 Fred, together with many other fellow winegrowers, founded respect-BIODYN, a community that consistently implements and lives biodynamics in viticulture. Spontaneous fermentation with natural yeasts: weeks, sometimes months of maceration on the skins, patient maturation, without intervention or additives are just some of the "secrets" of Fred Loimer and his wines, a true star in the Austrian Kamptal region.
